## **DETAILED ACTION**

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Applicants are required to identify all the structure in the specification that correspond to applicant's detection means and message generator means. See MPEP 2181.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10, 44, 48-57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Since the examiner is required to interpret the claims as corresponding to that disclosed in the specification by applicant, and because the specification fails to identify such structure at this time, the claims are considered indefinite.

### ***Allowable Subject Matter***

Claims 51-57 are allowed. The prior art of record does not teach the combination of a magnetic external activator, a switch, and a processor that generates messages regarding the arrhythmia detector status.
